- 1. A television program selection system, comprising:
 a grid of television programs slotted for a particular time
 and channel, said grid containing key frame images of each
 program; and means to select the slotted program to reveal
 a sequential showing of said key frame images.
 - 2. The television program selection system in accordance with claim 1, wherein said key frame images are invoked in a sequence following the story line or progress of the program.
 - 3. The television program selection system in accordance with claim 1, wherein one of said key frame images is highlighted.
 - 4. The television program selection system in accordance with claim 1, wherein said key frame images comprise at least one sound byte.
 - 5. The television program selection system in accordance with claim 1, wherein said key frame images comprise a textual message.
 - 6. The television program selection system in

- accordance with claim 3, wherein said highlighted key frame
 image is most indicative of the theme of the program.
- 7. The television program selection system in
 2 accordance with claim 3, wherein said highlighted key frame
 3 image comprises a single color.
 - 8. The television program selection system in accordance with claim 3, wherein said highlighted key frame image comprises a bright border.
 - 9. The television program selection system in accordance with claim 3, wherein said highlighted key frame image comprises a sound bite.

- 1 10. A method of selecting a preferred television
 2 program from a plurality of television programs, comprising
 3 the steps of:
- a) choosing a specific program from a display of textually described programs; and
 - b) displaying said specific program as a sequence of key frame images.
 - 11. The method of selecting a preferred television program in accordance with claim 10, wherein said display of key frame images in accordance with step (b) sequentially follows the story line or progress of said specific program and at least one of said key frame images is highlighted.
 - 1 12. The television program selection method in 2 accordance with claim 10, wherein said key frame images 3 comprise at least one sound bite.
